

**free fields**  
accelerator

**Customize customer, vendor and  
item fields in Microsoft Dynamics 365  
Business Central without development**

Available on  
**Microsoft AppSource**

Do you find that a field needs to be customized quickly but just don't have the bandwidth to wait for development time?

### What is the Free Fields accelerator by Prodware?

**Free Fields** is an out-of-the-box accelerator for **Dynamics 365 Business Central**, and helps companies who need additional flexibility to align their system with their own business management and data entry needs.

### Why choose Free Fields accelerator?

Without the need for any system development, the accelerator helps by:

- Enabling 14 fields (including the master card) to customize item, customer and vendor data
- Ability to customize a mixture of text, decimals and Boolean fields
- Customized fields are then propagated to Sales and Purchase documents and for statistical analysis and workflows

#### Sales document fields available for editing

- Blanket sales order
- Sales quote
- Sales order
- Sales invoice
- Purchase credit memo
- Sales return order
- Sales quote archive
- Sales order archive
- Sales return archive
- Posted sales invoice
- Posted sales credit memo
- Posted sales shipment
- Posted sales return shipment

#### Purchase document fields available for

- Blanket purchase order
- Purchase quote
- Purchase order
- Purchase invoice
- Purchase credit memo
- Purchase return order
- Purchase quote archive
- Purchase order archive
- Purchase return archive
- Posted purchase invoice
- Posted purchase credit memo
- Posted purchase shipment
- Posted purchase return shipment

#### Automatic field propagation

Once setup is complete, all selected fields will be available in Customer, Item and Vendor cards into the Additional Information FastTab. All can be used as regular fields, e.g. posting a sales order will propagate information to a shipment and invoice.
